

User Stories:

1. **As a vanilla Git power-user that has never seen GiggieGit before, I want to...**
 - experience a familiar Git workflow, but with an added layer of memes during merges.
2. **As a team lead onboarding an experienced GiggieGit user, I want to...**
 - quickly set up new team members, ensuring they have access to our custom meme packs, so the onboarding process is efficient.
3. **As a Git user who frequently switches between projects, I want to...**
 - be able to see new sets of memes for different projects so I don't get bored and also save the ones that I like to come back to.
 - **Task:** Implement customizable meme packs per repository.
 - **Tickets:**
 - i. **Title:** Meme pack configuration

Details: Create functionality that allows users to associate specific meme packs with individual repositories, ensuring that switching between repositories switches the meme set automatically.

- ii. **Title:** UI for switching between meme packs

Details: Design and develop a UI element that allows users to quickly view and switch between meme packs for the current repository without navigating away from the main interface.

“As a user I want to be able to authenticate on a new machine”

- This is not a user story because the focus is on a technical feature rather than what the user experience is.
