**User Stories:**

1. **As a vanilla Git power-user that has never seen GiggleGit before, I want to...**
   - experience a familiar Git workflow, but with an added layer of memes during merges.
2. **As a team lead onboarding an experienced GiggleGit user, I want to...**
   - quickly set up new team members, ensuring they have access to our custom meme packs, so the onboarding process is efficient.
3. **As a Git user who frequently switches between projects, I want to…**
   - be able to see new sets of memes for different projects so I don't get bored and also save the ones that I like to come back to.
   - **Task**: Implement customizable meme packs per repository.
   - **Tickets**:
     i. **Title**: Meme pack configuration

        **Details:** Create functionality that allows users to associate specific meme packs with individual repositories, ensuring that switching between repositories switches the meme set automatically.

     ii. **Title**: UI for switching between meme packs

        **Details:** Design and develop a UI element that allows users to quickly view and switch between meme packs for the current repository without navigating away from the main interface.
