Project Requirements

- **Goal:** Allow users to sync their work using SnickerSync, with added humor and snickering concepts to enhance the experience during merges.
- **Non-Goal:** Introduce complicated merge conflict resolution features beyond those provided by GiggleGit
- **Non-functional requirement 1:** Ensure randomization
    - **Functional requirements:**
        1. Implementation of a randomization algorithm to assign users into test or control groups
        2. Ensure correct logging to differentiate between testing and control groups
- **Non-functional requirement 2:** Security/Access Permissions
    - **Functional requirements:**
        1. Implementing different levels of access for different roles (developers, PMs, testers, users)
        2. Developers and PMs should have a dedicated interface
